

New Member Benefit Announced Credit/Debit/Prepaid Card Processing, Check Management, Gift Card and Payroll Services for PIA Members from Heartland Payment Systems

Because of the reduction in cash flow, individual and corporate customers want more and more often to pay by credit card. Implementing a versatile, reliable credit card processing service will help a company increase sales by enabling the company to accept all forms of payments from anywhere at any time, and decrease the time you have to wait for payment.

The good news is the Plantscape Industry Alliance welcomes Heartland Payment Systems as a new partner to its preferred provider program. Heartland can help you manage your electronic payments processing, payroll and gift card services more efficiently and cost-effectively. Heartlands competitive rates make the cost of card processing very affordable as more customers use credit/debit/prepaid cards instead of cash to pay for their purchases. As a Plantscape Industry Alliance member who partners with Heartland, you'll have confidence in your card transactions.

Implementing a versatile, reliable credit card processing service will help a company:

- Increase sales by enabling the company to accept all forms of payment, from anywhere at any time.
- Decrease the time you have to wait for payment.
- Allow for automatic monthly payments.
- Decrease the time and materials you spend creating and mailing/emailing client invoices.

Become a member [online](#) or call 707/462-2276. We look forward to sharing with you and all our valued members, the most up-to-date interiorscape information to be found anywhere. You are very important to us...and we love to hear from you!
